# Standard Heaters & HVAC

Evaporator & heater - Falkon

Water heaters  
Electric heaters  
Evaporators and combi

Heater - Alizé

On the top solutions

Rooftop unit - RK12 / RK14

Complete electric A/C - Elektrik

Evaporators & combi's rooftop  
with condensor  
Electric rooftop units

## Specific Solutions

Some items dedicated for minibuses, forklifts, UTV...

Heater for minibus  
Silencio 2

Water or electric heater for forklift  
Alizé 2 VI

UTV heater or A/C - Compact FAI

All needed accessories

Trim Line

**For water** To connect to the heater, to control & deviate the water, and to make it circulating through the circuit.

Straight bulkhead connector

Y connector

Water pump

Water rubber pipe

Water valve

**For A/C** A large catalog of components for standard or electric A/C

Compressors  
standard, hydraulic, electric

Fittings, classic or clip system

Adaptor  
The easiest way to install an additional evaporator

**For command** Mechanical, electronic or full automatic command for A/C, heaters and pressurization.

PCK control panel  
full auto or mechanic

Electronic regulation

Many different cable controls

Kalori Trim Line<sup>®</sup>  
range

Louvers, grilles and accessories  
A comprehensive, functional and stylish  
range for an efficient air diffusion.

HVAC Kartel - AC 4.5 kW - H 6.1 kW

Falkon vertical Kombi  
AC 7.7 kW - H 10 kW

MK1 - AC 7 kW - H 7.8 kW

Roof top KANADA II Kombi  
AC 4.5 kW - H 6.5 kW | Including condenser and filter

Hydraulic compressor

**Construction machinery**  
Even in the most rustic machine KALORI's efficiency is required

Air conditioning

Thanks to the standard range, it's really easy to realize a complete installation including HVAC, pressurization & full automatic control

**Tractors & agricultural machinery**  
Offering comfort to the driver all day long and protection against noxious particles.

Calibrated overpressure flap

Pressurization

# Transport for disabled person

Improving patients' transports

Evaporator combi Kool FAI : an aesthetic innovation

A large part of the R&D power of Kalori is dedicated to innovation for ambulances and disabled person transportation.

This gives birth to a world of innovative solutions for the comfort of patients & drivers.

We provide everywhere in the world specific kits really easy to install.

Our strong knowledge of this market ensures you to obtain a real comfort at a very competitive price.

Roof ventilator : Design, efficiency and accessories for an easy installation

A/C or combi Klimatop : efficiency and gain of space in the cellule

Adaptator : the easiest way to connect an additional evaporator on the original A/C circuit

# Ambulances

Patient's comfort whatever the outdoor conditions are

From the smallest evaporator to the 18KW rooftop for rough conditions  
With or without additional compressor

# Minibuses

Heaters, air conditioning and roof ventilators.

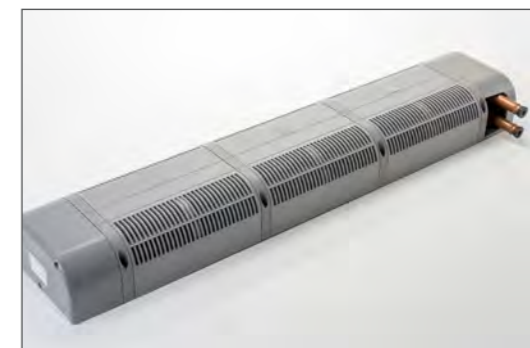

Evaporator Falkon Double Kombi

Rooftop unit RK14

Heater Silencio 2

Heater Baikal : ventilated convector

**Electric vehicles**  
 Opting for a better battery life without any compromise on the comfort of the driver

**Airport vehicles**  
 Simple and basic solutions

Heater Kelec EVO 1

Electric compressor

Electric Heater Alizé 2 Elec

Kalori has been one of the first manufacturers to offer electric heaters for those vehicles. The use of PTC resistance brings together the respect of the battery life, security and high-performance. Kalori's know-how about air conditioning systems permits to get an optimal comfort thanks to brushless motor semi-hermetic compressors.

All the electric heaters also exist in water heater version.

**HVAC MKO**  
 Evaporator combined with water or electric heater

**Forklifts**  
 Compact and strong solutions

Heater Alizé 2 VI

Heater or evaopator Compact EVO2 FAI

Complete A/C system Elektrik

Heater Mini Kelec

# Military vehicles

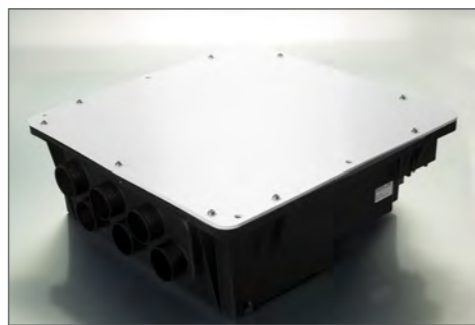

For the heaviest off road applications the strongest and powerful HVAC with specific ECM capabilities

HVAC HK1 Kombi ED7 with specific ECM filter

Evaporator combi Falkon

Heater Maritime Falkon Box

Specific ECM filters for military applications where strong performances and mechanical resistance are required.

Some products of this range can be used for boat application too. Some units, once installed in a recycling box can be fitted in the engine room.

# Boats

Demisting and giving comfort for pleasure and professional boating

The Kalori crane air conditioning creates a maximal comfort with a real supply longevity.

Specially developed, they are the mix of our classic cab know-how and our mastery on products working with alternating current.

# Tower & container cranes

An air conditioning dedicated to a high-precision work station

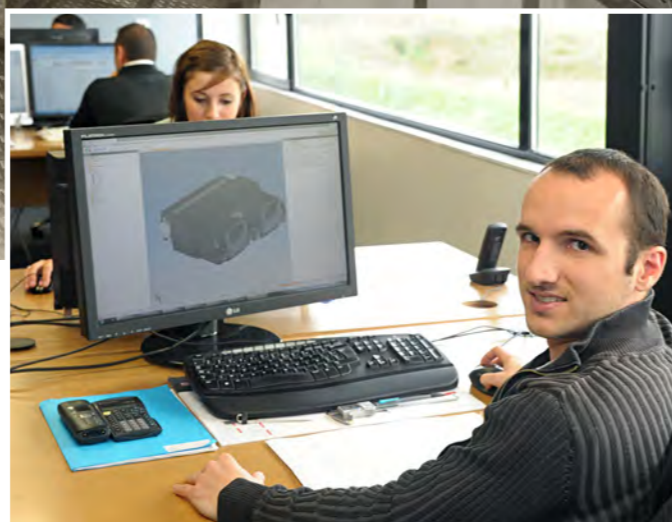

Electric heater Falkon Defrost  
220 or 400v AC

RK12 Electric - AC 6kW - H 7.3kW  
a complete electric HVAC including electric compressor

R&D  
SimulKa®

Our aim is to develop a standard range which could be adapted to a large number of uses. Therefore the manufacturers could benefit from reliable solutions, easy to integrate and remaining competitive. The component sizing relies on calculation methods coming from the car industry. The result is checked in our climatic chamber which is able to simulate any climate of the globe.

Injection &  
Vacuum  
plastic

Kalori masters its products' design and manufacturing. The ERP is the same for both manufacturing places. Moreover our management is meticulous. Both ensure

a perfectly mastered delivery. We apply a high quality for our products as well as for our order management. That is why you can satisfy your customers.

Laboratory
